## Value Added Lenses, Domes and Skylights for Transportation, Building and Playground Industries

Replex Plastics is the largest supplier of high impact, high performance domes in the country. A name known for excellence in plastics manufacturing, Replex has built its reputation on quality products and outstanding customer service. Innovative manufacturing technology sets Replex apart from the pack. State of the art computer controlled forming equipment insures your order is made to exact specifications each and every time. Operator error has been virtually eliminated through highly refined automation guaranteeing part to part consistency. Replex has the technology and people necessary to produce the highest optical clarity and quality mirror formed parts in the industry. A 100% quality control inspection program prevents even the slightest manufacturing defect from reaching your door.

Replex lenses and domes are 20% brighter than glass. This

allows easier image detection and identification.

Replex design engineers test all parts before production begins. In addition, all Replex lenses have gone through extensive salt spray testing by an independent laboratory to insure a durable back coating. These lab tests have proven the backcoating on Replex lenses far out last the competition. Replex high impact plastic is fifteen times more break resistant than glass.

Replex manufactures parts in sizes up to 48 inches for indoor or outdoor use, with hardware available.

Replex also leads the way in acrylic, Polycarbonate and PETG thermoformed parts. These are standard production items in stock and ready for *your specifications*. *Replex is limited only by your imagination.*
